LOGISTICS, MATERIALS AND SUPPLY CHAIN MANAGEMENT

A.A.S. DEGREE/CERTIFICATE

ACC
ALVIN COMMUNITY COLLEGE

Study to Become a Logistics Manager

The Logistics, Materials, and Supply Chain Management AAS degree is designed for the student to develop the knowledge and skills that will prepare the graduate for employment in areas within the total supply chain. Supply chain refers to a large network of critical business functions within an organization that work collaboratively to deliver products from a supplier to a customer. Logistics Management focuses on the management of daily operations concerning the movement of goods, services, and related information from the point of origin to the final point of consumption by the customer.

Career Opportunities

The field of logistics offers some of the most well-paying and sought-after careers in today's job market. According to the Bureau of Labor Statistics, the employment for logistics is projected to grow five percent (5%) from 2019 to 2029, about as fast as the average for all occupations, in the State of Texas.

According to Texas Wages and Employment Projections for the Gulf Coast, including Brazoria County, the projected employment is 10,875, and a percent change of 17%. This includes hourly wages of \$55.57 and annual wages of \$ 115,580 for a managerial position as of May 2019.

What Will I Study?

ACC's program will provide knowledge in all aspects of logistics, materials and supply chain management including business, management, operations, purchasing, procurement, acquisitions, contracts, transportation and mobility, and retail management, distribution, and International Logistics. You will learn about industries that rely on logistical tracking including warehousing and distribution centers; the shipping and receiving of goods by rail, air, ocean, and trucking services; management of the centers; forecasting; and customer or planning services.
